sheebadreams: Yeah, I also got that a lot lmao
sheebadreams: At some point, she was dubbed "mini me"
smittyyyy: I don't know any of my family outside my mother, father, and sister. I am an exact copy
sheebadreams: o.o
smittyyyy: Only difference between us is that I am taller and a redhead.
sheebadreams: Ah
smittyyyy: He's shorter and has black hair.
smittyyyy: Even our facial hair is the same.
sheebadreams: My whole family is red heads
smittyyyy: I have no clue if my family is.
smittyyyy: Most are in Russia still.
sheebadreams: Oh?
sheebadreams: I find it odd how my family is Irish and French Canadian

smittyyyy: Yeah I’m the only redhead I know of. But my dad’s side are German Jews so they died
smittyyyy: But both my mother and father carried the MC1R gene.
smittyyyy: My father had partial expression too — red facial hair.
sheebadreams: That's neat
sheebadreams: Never heard of anyone having partial expression
smittyyyy: So the gene has been down the line for a while but I’m not sure if anyone actually has
sheebadreams: Ah
smittyyyy: Males with the MC1R gene sometimes express it in their facial hair
smittyyyy: That’s how you can tell they carry it.
smittyyyy: If their beard/mustache is red — they’re a carrier.
sheebadreams: Ahh makes sense
sheebadreams: Oh?
sheebadreams: Interesting
smittyyyy: Yes that’s why some guys will randomly have red beards despite not having red hair!
smittyyyy: If Hydro and I were able to have kids we’d have 100% redhead kids
sheebadreams: Oh lol
smittyyyy: Because we’re both double carriers of the gene.
sheebadreams: o.o
sheebadreams: I mean maybe I'll see that in person soon lol
smittyyyy: (Well, more like 99% chance)
sheebadreams: Depends on if yall want to meet at AC
smittyyyy: And we’d also have a 95% chance of all our kids having blue eyes
smittyyyy: And a rare 5% of green
sheebadreams: o.o
smittyyyy: Since we’re both blue eyed
smittyyyy: :Scrum:
smittyyyy: So basically if we could theoretically have kids — they’d be copies of us
smittyyyy: We hit the recessive lottery lol.
smittyyyy: Oh and the kid would have ~95% chance of A+ blood type too
smittyyyy: I forgot lol we have the same blood type
sheebadreams: I have A- lol
